COMPANY PROFILE

Our characteristic appeal to all our clients is our ability to deliver 101% on time.

Our commitment to meet your specific requirements with a “can do” approach makes us increasingly popular with our existing clients and our other prospects. Our success ratio is our ability to retain all our clients ranging from a home user, SME to a Multinational corporation in UK and India.

KEY FACTS

- We continue to develop our portfolio by working alongside many creative and interesting companies across London and India.
- We provide services across Real estate, Legal, Financial, Media and Business consultants, Software providers, Charities, and Service industries.
- We provide 24/7 services and there is no extra charge for implementing priority networks on weekends and bank holidays.
- We are the only IT service provider who provides completely FREE IT TRAINING* to our clients as a value added service.

Dedicated and skilled

NIVID is a accredited partner of major networking vendors across UK. Our networking team consists of Engineering Graduates coupled with Microsoft and Cisco certified Trainings. The uniqueness of our team lies is the clarity of focus they possess in relation to every work they undertake. This not only assures fast completion time but also indirectly results in cost-reduction for our clients.

Fast, energetic and committed

24/7 Monitoring + Threat removal= Protected Networks

OUR EXPERTISE

Our customized approach enables us to offer services suited to our client's business needs. We prefer to offer services and products which can reflect positive impact on business and employee productivity, cost-reduction, business growth and network uptime.

Our team is highly trained and possess the required technical clarity to offer services for:

IT Networks

- Infrastructure (Data, Comms, Power)
- Fully structured cabling systems
- Multi / Single mode fibre
- Mains power cabling
- VOIP, Computer telephony integration
- Communications hardware/supply and configuration
- The removal and disposal of existing redundant equipment
- Network design (installation, management, maintenance and security)
- Network up gradation and expansion
- Security implementation
- New Network installation projects
- Internet and Intranet solutions
- Communications (Remote Access, Mobile and Teleworking, VPN)
- Network Management Support
- E-Commerce solutions

Telecom networks

- PABX Telephone systems
- Voice infrastructure

Hardware and Software

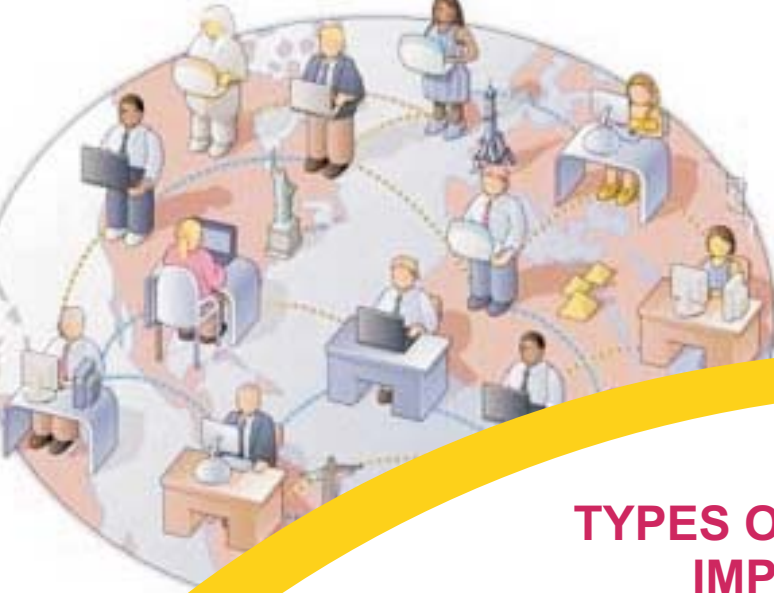

- Routers & Cables
- Switches
- Hubs
- Firewall
- Wireless Equipment
- Computer hardware and equipment

Other networking equipment as required

TYPES OF IT NETWORKS IMPLEMENTED

As widely known, computer networks come in many different shapes and sizes. Increasingly popular phrases like WAN, SAN, WLAN seem lost on average people. Just as the industry refers to nearly every type of network as an "area network, we have categorised our networking team into two key specialised categories for businesses across various industries.

● Corporate team

Our corporate team undertakes design, implementation and installation for large and corporate networks such as:

MAN (Metropolitan area network)
SAN (Storage area network)
CAN (Cluster area network)
WLAN (Wireless LAN)
Wireless networks
Virtual LAN and VPN

● SME team

Our SME team undertakes design, implementation, and installation for Peer to peer and LAN, WAN, VPN, Wireless networks and Intranet.

Qualified Talent + Domain knowledge = Proficient Networks

CABLING SOLUTIONS

At NIVID LTD, we specialize in connecting fully integrated infrastructure solutions to maximize your investment and support your business vision. From cabling system design and configuration, video cabling, fibre optics, and rack/data cabinet cleanup to converged networking, server room solutions, and voice communications, NIVID's Structured Cabling Team provides fully comprehensive cabling solutions.

Our cabling team is fully trained for following types of cables and systems:

- **Cat 5, CAT 5E, CAT6**
- **Fibre optics**
- **Cat 7 UTP and STP**
- **Concealed cabling**
- **Wireless networks**
- **Voice and data integration**
- **Office floor box installations**
- **Setting up server room; Installation of rack servers, switches, hubs, routers etc.**
- **New points added to an existing network**
- **Bespoke Cabling Solution -**

If you have a specific structured cabling requirement; NIVID LTD can offer a bespoke installation service in case of Large installations. We can install any cabling scheme to your supplied specifications including IBM Type 1 and CAT 7 schemes subject to survey.

Integrating IT and Businesses to gain competitive advantage.

When making a cabling decision, it's important to choose well. No other component in your network has a longer life cycle than your structured cabling system.

Though it typically accounts for only 2% of your network investment, improperly designed or installed cabling can account for 80% of network problems - and downtime costs can soar.

NIVID LTD can help you create a plan and system that reduces the need for moves, additions, changes, and upgrades. So in addition to minimizing workflow disruptions to keep your people productive, you'll also save on reconfiguration and installation costs.

Achievers, and focused

PRONET

Industry experience + Skilled Assets = Professional Networks

POST SALES SERVICES

The atmosphere at NIVID LTD fosters professional and social culture where talented people with diverse backgrounds and skills form our sales support team to best serve our client's interests.

Our sales support options include:

60 Day Warranty

Any network installation carried out by us is covered by a 60 Day Warranty which ensures technical support in case of any troubleshooting required within the time frame.

Commission and testing

Fully documented and certified cabling test results on all installations.

Post Network Installation report

MAINTENANCE OPTIONS

We are particularly known for our maintenance options and response times. Our availability is 24/7 including bank holidays. Our maintenance options are based on high client involvement, rapid problem resolution, extensive business and commercial experience, strong technical expertise and cost effective packages.

Email/helpdesk	Onsite Support	Remote Support
Within 15 mts of request of service	Within 30 mts of request of service	Within 4 hours of request of service

Integrity, Ownership of tasks & Responsibilities

Accountability and Quality Assurance

Fact

To assess the true cost of running a backup and recovery operation. It is necessary to analyse your cost across the entire chain (Capture, removal, storage and recovery)

PRONET

Faster access to data + Data Security= **Prolific Networks**

PROJECT MANAGEMENT

On award of the project NIVID LTD will allocate a nominated Technical Consultant. Any deviations from contract or site issues should be reported to the Technical Consultant. All amendments or issues arising with regards to the project must be confirmed in writing to NIVID LTD before the amendments can be carried out.

Our Technical consultant will be responsible for:

- **Initial Site survey**
- **Project plan proposal** (recommendations based on network designs, current network architecture in use, time line and proposed methodology)
- **Liaise with client at regular intervals for any amendments required.**
- **Network implementation and installation**
- **Final network testing and completion**

FLEXIBLE WORKING

Our flexible working extends its culture towards our clients by placing top priority on our client's needs and business objectives. Our most popular benefit is our flexible practice of implementing network installation on bank holidays or on weekends at no extra charge. The key benefits to your organization are:

- **Minimizing Health and Safety issues**
- **No disruption to work or loss of network connectivity**
- **Cost effective**

STATS PLEASE!

According to Datamonitor, only 13% of UK businesses are encrypting their stored data to defend against possible white collar attacks and other attempted internal security breaches.

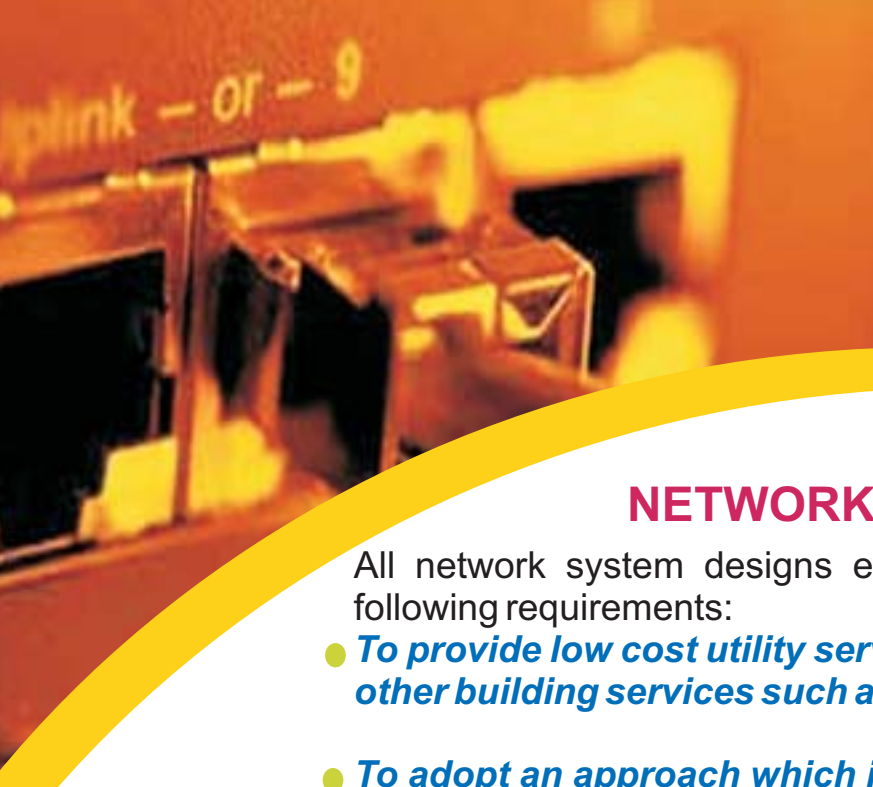

FACT

A hacking attack can mean loss of e-business due to damage, loss of confidential customer information such as credit card details, theft of essential information.

**IT Staff
Augmentation
on Project basis**

PRONET

Security upgrade + Network Mgt= Progressive Networks

NETWORKING GUIDELINES

All network system designs executed by NIVID LTD will cover the following requirements:

- **To provide low cost utility service distribution, in a similar fashion to other building services such as electrical power.**
- **To adopt an approach which is flexible enough to meet the needs of all users and to incorporate existing network implementations where necessary.**

- **To provide manageable network components wherever possible. To enable both reactive and proactive network management and control. This will enable rapid fault identification and resolution from a central location, perform day to day administrative tasks, and gather information for planning, growth and changes.**
- **To provide a network that is supportable. It is widely acknowledged in the industry that the capital cost of a network is only a fraction (14-20%), of the total cost of network ownership over a five-year period.**

Ongoing support costs, including moves and changes, frequently form the vast majority of the total costs. These costs can therefore be reduced through extra diligence during the design phase of the network, thus leading to a high quality, exceptionally flexible and modular standards based design. Our design methodology ensures that these costs will be minimised through the simplicity and elegance of system design, selection of components and the system configuration.

USP OF OUR TEAM

**"Integrity,
Determination and
Expertise"**

PRONET

Mobility + 24/7 data access = **Procurable Networks**

Network Security Implementation

There is more to security than just buying and installing hardware and software products. It is of paramount significance that companies gain valuable understanding of the level of effort needed and life cycle management issues involved in developing and maintaining robust security architectures.

NIVID LTD provides services for the specification, installation, integration, and testing of security solutions to safeguard customer network and computing infrastructures.

Our security engineers are trained, certified and experienced with all major security solutions such as:

- **Firewall**
- **Virtual Private Network (VPN)**
- **Intrusion detection and Monitoring controls**
- **Anti-virus protection**
- **Content filtering controls for email and web access controls; (authentication and authorization)**
- **Network Security controls (adaptive scanning)**
- **Audit controls**

For security implementations, NIVID LTD provides:

- **Encryption systems**
- **Equipment acquisition assistance**
- **Installation/configuration**
- **Integration/Deployment**

Network Security Implementation with NIVID LTD ensures that our clients are aware of how the security procedures implemented meet their organisation's business objectives and test their configuration during each stage of development.

WHO CAN WE BENEFIT WITH NIVID?

Whether you're a CIO, Director or an IT manager who needs to undertake changes to existing network, moving premises or taking up additional sites and you require seamless, converged communications services from your Network Service provider NIVID LTD can help drive your business forward.

WE'RE DIFFERENT. HERE'S WHY...

- *Lowering cost of ownership*
- *Improving business and staff productivity*
- *Consistent and improving service levels*
- *Business perspective on each IT implementation.*

HOW DO WE DO IT?

At all levels and process, we retain the clarity and focus we have sought to create at NIVID LTD.

The fact that our clients deal with IT consultants and Engineers rather than sales executives makes us refreshing and appealing. Our aim is not to blind clients with technical jargon and flashy power points. Rather we focus on demonstrating how our solutions have benefitted clients with the support of factual client case studies, testimonials and simulated scenarios.

- *Cost conscious Companies*
- *Growing Businesses*
- *Rapid movers*
- *Global trend setters*

For us, integrating IT securely with business has evolved into a process which can help our clients reap sound financial gains on their systems and networks.

You can visit our website www.nivid.net for detailed information on our working methodologies and strategies.
